

ARE MASKS SAFE?

Masks pollute the environment

An estimated 1.56 billion masks entered the world's oceans in 2020. The potential 13.75 MILLION pounds of plastic pollution may take as long as 450 years to break down while endangering marine wildlife and ecosystems.

"There is a lot of risk to mask wearing. Not the least of which is your carbon dioxide build up."

Dr Lee Merritt MD

https://www.americasfrontlinedoctors.com/custom_videos/mask-myths/

"Masks do not prevent the transmission of viruses the size of COVID-19."

<https://www.americasfrontlinedoctors.com/wp-content/uploads/Danish-Study.pdf>

Masks prohibit the communication of a smile and clarity of expression.
